## Profile

Hello, I’m Poom — A full-stack developer from Bangkok, Thailand. I’m specialized in making web applications for businesses. I strive to use the best technologies available in combination with the best practices.

Jan 2021 - Present

### Ogilvy

Bangkok, Thailand  
Full-time

### Full-Stack Developer

Ogilvy is the world’s leading marketing and advertising network with over 183 locations around the world. Working here gave me the opportunity to create value for giant companies, while exercising my leadership skills leading multiple production-grade software projects.

Mar 2015 - Present

### Kiluth

Bangkok, Thailand  
Full-time

### Full-Stack Developer

At Kiluth, I familiarized myself with many front-end and back-end technologies such as React, Node.js, PHP, and more. I have always taken the best practice approaches when architecting my systems. Here, I developed custom CMS software, files management software, POS software, and other business-aiding softwares.

Aug 2020 - Dec 2020

### True Digital

Bangkok, Thailand  
Contract

### Full-Stack Developer

Working with True Digital was an exciting experience. I was commissioned to design and develop a production-grade live-streaming website for an online conference hosted by Chulalongkorn University for The International Association for Dental Research (IADR).

## Education

2016 - 2020

Pathum Thani, Thailand

### Rangsit University

Bachelor of Science in Information and Communication Technology

2014 - 2016

Bangkok, Thailand

### St. Andrews International School 107

IB Diploma (English Language and Literature HL, Physics HL, Business Studies HL, Math Studies SL, Geography SL, Chinese Language SL)

# Work Experience

Aug 2020 - Dec 2020

## Chulalongkorn University

Bangkok, Thailand  
Contract

## Full-Stack Developer

Working with the faculty of dentistry at Chulalongkorn University, I redesigned, improved, and developed their existing backend system for managing their records to be more modern, secure, and user-friendly.

May 2019 - Present

## Hash Square

Bangkok, Thailand  
Contract

## Full-Stack Developer

Hash Square is a software production house where I gained the experience in working with the international clients. Here, I developed business solutions for businesses such as restaurants, laundromats, universities, and more.

May 2019 - Present

## Balancena

Bangkok, Thailand  
Part-time

## Products & Packaging Designer

Balancena is a cosmetic products manufacturer and distributor. I was commissioned to design their new lines of cosmetic products under the brand Sugar & Pepper which is sold and exported to China and other countries.

Aug 2016 - Present

## Mary Manufacturing

Bangkok, Thailand  
Part-time

## Products & Packaging Designer

Mary Manufacturing is a perfume house based in Bangkok, Thailand. Here, I learned to design and render 3D graphics in combination with packaging design. Some of the best work I designed include reed diffusers, body perfumes, and more.

Apr 2016 - Nov 2016

## We Are Cheers

Sydney, Australia  
Full-time

## Graphic Designer

Before becoming a software developer, I was a graphic designer. Working with We Are Cheers (Australia), where I developed a taste for minimalistic graphic styles, I learned to design logo, websites, product packagings and more.
